NOTES

Students may apply through official Representatives of our University in many lands, and also through members of the International Academic Union.

Oriental University was founded 1903 and is chartered under the laws of the District of Columbia (1904) and the State of Virginia (1908).

Oriental University is the pioneer internationalistic University and leading member of the International Academic Union, an association of many educational institutions and academic societies in all countries of the world. Copy of the Register of the International Academic Union may be obtained for 25 cents.

Oriental University is an independent University for students of all classes and all nationalities. It is co-educational, inter-racial, non-sectarian, and truly progressive.

It claims to have the highest class of students, candidates, and graduates, and its professors are fully qualified.

Oriental University has the best class of friends and its enemies are unprogressive and materialistic competitors, whose attacks are not only disproved in courts, but are obviously ridiculous.

Oriental University believes that residence colleges are for undergraduates; but that graduates profit far more by correspondence courses. Correctness of this surmise has been proved conclusively during the last seventeen years of its history.

Oriental University has helped more worthy and ambitious candidates to a real and lasting success than most other universities anywhere in the world, considering time of existence.

Oriental University is the most advanced universalistic University, eliminating wrong materialistic interpretations and dangerously false dogmas in science, religion, etc., and it paves the way to fruitful research in all visible and invisible phenomena, discarding the notion that the invisible facts are mere unknowable noumena, as the backward universities still wrongly teach.

Medicine and Theology, for instance, are being revolutionized by Oriental University, and in Political Science, the President's idea of the "Theomonistic State" is most helpful for a far better reorganization of all states.

"Complete List of 648 Correspondence and Residence Courses" may be obtained for 5 cents. A "Complete Descriptive List of Courses" appears in 1921 and costs 35 cents. "The Oriental University Album" with pictures of professors and graduates costs \$1.

"Testimonials from Newspapers and Letters concerning Oriental University," 50 cents. "Short Biography of President Helmuth Peter Holler," 5 cents.

ANNUAL REPORT OF THE PRESIDENT FOR 1919-20.

SEVENTEENTH YEAR.

The so-called "end" of the terrible war in Europe has made special opportunities and created new demands for higher education, mostly for correspondence courses. Consequently, all state universities in the United States and nearly all large private universities too, who so far had treated extension and correspondence study methods in a more or less careless manner, have all now started in a determined effort to give systematic instruction by mail.

Our spiritual patron, the former U. S. Commissioner of Education, Dr. Harris, seems to have put forth strong efforts of arousing the interests of these institutions to work on his plan which he outlined in many reports and special articles while he was among us in the flesh, and which highly valuable suggestions were shamefully neglected by his successors in office.

It is a great satisfaction to me that not only the U. S. Bureau of Education, but also Columbia University and other large institutions, who have often attacked me and the Oriental University because we grant academic degrees for correspondence study, are now themselves not merely admitting that the idea of Dr. Harris, Dr. Harper, former president of Chicago University, and myself is the correct one, but are now almost frantic with the desire to push this correspondence instruction method on a university basis to the limit, as witness the publication by the U. S. Bureau of Education of two notable pamphlets entitled, "The Application of Commercial Advertising Methods to University Extension" and "The Administration of Correspondence-Study Departments of Universities and Colleges." 119,000 extension or correspondence students are already enrolled in the United States.

But still more is this new movement expressed by the desire to have new laws enacted. There are at present more than 70 educational bills pending before Congress, of which 20 are of real importance, and of these 20, 5 are aiming at establishing laws furthering extension of correspondence instruction by the States, and of which the "Raker Bill for a National School of Correspondence" is the most important. It creates a board consisting of the President and the heads of the Executive departments under whose direction the Commissioner of Education is to formulate a plan for the classification and distribution of Government publications and to cause instruction by correspondence of persons resident anywhere in the United States. This bill should have the support of all citizens, and I specially recommend it to the members of Oriental University. It is a move in the right direction which supports my often repeated advice to "offer the best education to everybody anywhere." Only by education can efficiency and culture or civilization be advanced.

How much the United States needs better systems of bringing education to all classes was only too clearly proved by the fact disclosed by the war of the existence of 5,502,351 illiterates of ten years of age and over in the United States, to whom must be added 3,089,723 non-English-speaking persons.

Up to the end of the present corporate year, our University enrolled in all 1,400 students. From where these students came is told in this new Complete Register. It will be seen that students were drawn from almost every country of the earth, proving conclusively the justice of our claim that Oriental University is the pioneer internationalistic university.

We are also enabled by this new complete register to state exactly to what proportion Oriental University is a residence or correspondence university, and to what extent an undergraduate or a graduate university.

During the 17 years of the existence of our institution, we enrolled—

458 residence students, namely, 34 per cent.,
884 correspondence students, namely, 66 per cent.,
615 undergraduate students, namely, 45 per cent.,
722 graduate students, namely, 55 per cent.

This year we have increased the number of courses considerably, which necessitated an increase in the number of instructors. We have now in all 107 members of our University Faculty, namely, 44 Resident Professors and 63 Non-Resident Professors.

The number of students during the last year was still below the normal number we had before the war, namely, only 200. Indications given by the

large number enrolled during the first two months of this year would point to an enrollment of nearly 500 this year. Our aim must be to bring it up to 1,000 students during next year. For this purpose we should have one or several publicity managers, and this question, too, has to be decided today.

As usual, we have had opposition from competing universities, and this year especially in Switzerland. My personal experience with the various ministers of Switzerland to the United States, in this city, has convinced me that there is just as little fair play in Europe at this time as there is in the United States. Of American injustice we had a striking evidence again in the copy of a letter of Mr. S. P. Capen, "specialist of higher education" of the U. S. Bureau of Education, sent to an inquirer in Europe, which proves conclusively not only the total ignorance of that gentleman, but also his malicious servitude to mammonism. By implication he calls the Oriental University "not reputable," and he advises to "place no reliance in the alleged claims" of our University. However, he admits that we are incorporated under the laws of Virginia—that we have an excellent charter from the District of Columbia, a fact which he could have known for many years, is not yet known to him, it seems—and he admits that we are legally authorized to confer degrees. I can only say that if I were as ignorant as Mr. Capen I would be ashamed to call myself "specialist of higher education." Besides, what business have our public employees, like Mr. Capen, to make propaganda for the State-paid institutions against private universities? Are we not improving and enriching our country? Surely, America is illiterate enough not only to be grateful for the private universities, but it should do all it can do to help, and not to hinder them in their arduous and unprofitable tasks, unprofitable as compared to commercial pursuits. I hope that the whole bunch of ignoramuses in the Bureau of Education will be swept out of office, together with the present mammon-serving and anglicizing government. The world has had enough of these man-killing and soul-destroying fools. Let us pray and work for a better day, also for higher education! Let us challenge these ignoramuses to prove that we are not doing as good a work, if not far better, than they are doing in their little offices where they are merely jumbling together what others have written before! Till real originality, as that which was once shown by Dr. Harris, enters again the Bureau of Education, American education is doomed.

A new departure in our work has been the publication of a number of outlines of courses, which are copyrighted. In time, we hope to print outlines of all our courses. These outlines find favor even in foreign countries, and we have received already some orders for them from foreign institutions.

While we had to neglect the International Psychological Society, for which we should appoint today a new secretary, the International Academic Union has received proper attention, and we have at present already 66 member institutions and societies, which is very encouraging. There seems to be an unlimited field for this Union, and I believe, with the right kind of secretary, this Union will grow very rapidly. Once having a sufficient number of member institutions all over the world, the power of our work will be felt, and the foes will have to change their tactics, if not entirely to cease fighting us. Until then, let us keep our powder dry!

Our Alumni and Alumnae Association is now being reorganized, and in Dr. Miller we have a very able secretary. The annual fee for graduates is only \$1, for which the University publications during the year are delivered free of charge. This means an actual saving to the graduates.

With special tenderness we view the Universal Theomonistic Association, which, although an independent corporation, is yet closely associated with our work. There cannot be any doubt that the world needs and, by the grace of God and the wonderful assistance from the angels, actually will embrace the new and most important principles of Theomonism. Theomonism is not merely a new revealed religion, but also science of the truest kind and universal philosophy. No educated person at this time can afford to neglect the thorough study of Theomonism. The Theomonistic Bible and other Theomonistic publications are everywhere eagerly read, as we can judge from the many letters which we receive concerning them. There seems to be a heavenly power emanating from Theomonism which gives great consolation to the souls; and

those who have been truthseekers for many years, and who have gone from orthodoxism through all kinds of isms and modern thoughts, when arriving at Theomonism, exclaim: "Now, at last, I have found what I was looking for all my life."

Our sympathy with the Theomonistic Association was proved in granting annual loans to the Association, fully guaranteed by the business of the Association in hand and its stock of printed publications, which loans, once the publications are complete and put on the market as bound books, will be repaid with interest very quickly, no doubt.

Looking now back upon the year just passed, we must acknowledge, with sincere gratitude, that God surely has been with us. Not only have His mighty angels protected us against all enemies, as witness our great victory in the court of Switzerland, and the inability of Mr. Capen of the Bureau of Education to take from us our Virginia charter, which he threatened to do, according to his own letter mentioned above, but God's angels have made our University very popular with the highest class of students and candidates everywhere, so that today, as has actually happened, letters addressed to us from far-away countries as "President Holler, University, United States," or "Oriental University, America," reach us with only a little delay. Surely a sign that, as the Corporation Commission in Richmond once stated, the Oriental University is doing business with the whole world.

But I must close. Friends and Co-Workers. The world would be glad to get a real league of nations just also to small nations; such as has never been started. But the world will not get such a league till the work of Oriental University and of the Universal Theomonistic Association has prepared the way. I make this as a prediction. And I am confident that after, say, fifty years, our successors will realize that this is true. Meanwhile, let us remember that the dogs bark after a running man. Those who stand still are hardly noticed. Let us not stand still, but let us hasten forward! "With God, for the glory of America, and the Salvation of the Whole Earth!"
